Life Is On

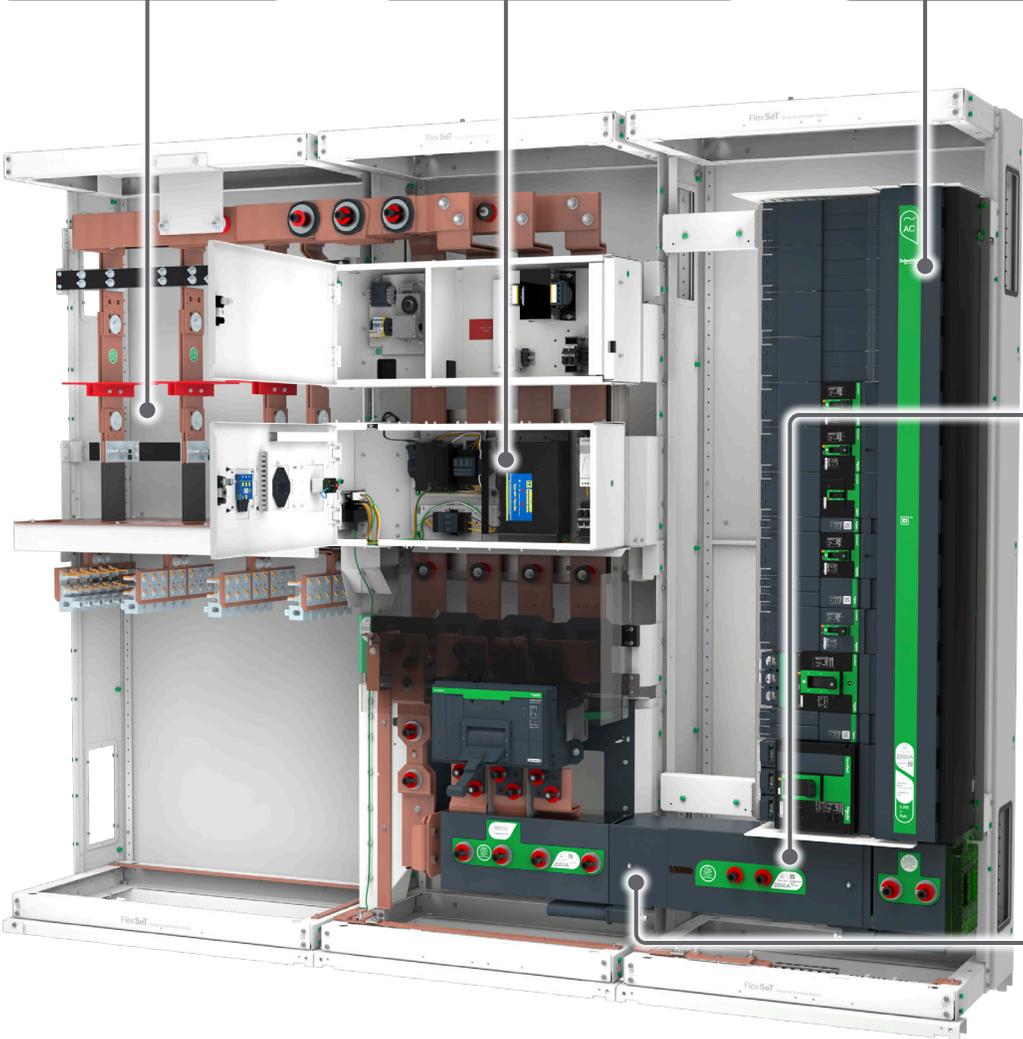

EUSERC-compliant:
Combination underground pull section with UCT for most EUSERC utilities.

Instrumentation compartment:
Simplified wiring harness makes plug-n-play metering and monitoring accessories easy to install.

Plug on Neutral (PoN):
PoN delivers a clean installation and easy modification by simplifying wiring for load side neutral connections.

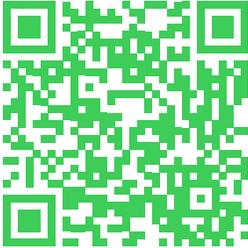

Visual torque indication:
Visi-Tite™ bolts ensure proper torque validation and improves reliability. Red flag break indicates correct torque value.

Through bus section for "splicing": Field-installable bus bridge makes connecting sections a breeze with our patented I-Line™ bus joint and Visi-Tite connections.
